

James Bratton

AI Solutions Architect

jamesbratton.com · Remote · New Jersey / New York / Philadelphia

SUMMARY

Enterprise AI solutions architect with a background in business intelligence and data leadership, working the full path from client discovery through architecture, AI integration, workflow design, security and deployment. Builds LLM, RAG, agent and document intelligence solutions on multi-tenant SaaS foundations with RBAC, authentication, APIs and workflow engines, delivered across legal, healthcare, education and compliance settings where auditability and human review matter as much as model output. Shipped products including Compliance Assist AI, Intake Form Pro, Adam Legal Systems and YRC AI Receptionist.
